SUBJECT: Site Release; Flake 1, SRS Mining, S/270/019, Millard County, Utah

6/30/05
On 08/17/2005 this site was visited and the site was looked at to determine if it could be released based on the operator's contention, that the site was cleaned up and the pit was regraded and the trash was cleaned up. The most important contention on the operator's part was that the BLM would release the site without complete revegetation and it would be fine to leave it as a rock hound site. I am going to request that the operator write a letter to the division requesting a variance to revegetation and state why the site is stable as is. Once this is received from the operator and a BLM letter releasing the site is received, the site can be closed.
